

BEZAWADA HEMANTH CHOWDARY

Ongole, India · +91 83093 89928 · hemanthbezawada7@gmail.com · [LinkedIn](#)

OBJECTIVE

Final-year CS undergraduate seeking a Futureforce Graduate / AI Intern role at Salesforce. Experienced in building end-to-end ML pipelines, NLP systems, and data annotation workflows at production scale. Eager to contribute to Agentforce and Salesforce's AI-first product vision.

EDUCATION

B.E. Computer Science & Engineering Jul 2022 – Jun 2026

[Saveetha Institute of Medical and Technical Sciences \(SIMATS\)](#) · Chennai, India

- CGPA: 8.65 / 10
- Relevant coursework: Machine Learning, Deep Learning, NLP, Statistical Analysis, Data Structures & Algorithms

TECHNICAL SKILLS

Languages: Python, SQL, R

AI / ML: PyTorch, TensorFlow, Transformers (HuggingFace), Scikit-learn, NLP, Computer Vision, Seq2Seq, Feature Engineering

Data & Analytics: Pandas, NumPy, Power BI, Matplotlib, Seaborn, Statistical Analysis, A/B Testing

Tools & Platforms: Git, Jupyter, Google Colab, Oracle SQL, MySQL

Certifications: Oracle Cloud Infrastructure DS Professional · Oracle SQL Certified · Google Data Analytics · Harvard CS50

EXPERIENCE

Data Annotation Intern Sep 2025 – Dec 2025

[Lesoko](#) · Chennai, India

- Maintained 98%+ annotation accuracy across 10,000+ NLP and computer vision labeled samples, directly improving AI model reliability for production deployment, the same standard required for Agentforce training data pipelines.
- Refined annotation schemas for 3 concurrent ML projects alongside engineers, cutting rework cycles by 30% through structured QA documentation and edge-case protocols.
- Identified and corrected 500+ systematically mislabeled samples, preventing bias from entering downstream model training, a critical quality-control skill for large-scale AI systems.

PROJECTS - AI / DATA SCIENCE

Customer Behavior Prediction - Insurance Outreach Analytics Jan - May 2024

[Python](#) · [Scikit-learn](#) · [Pandas](#) · [Statistical Modeling](#) · [Best Poster Award, Tech Star Summit 2024](#)

- Engineered 15+ behavioral features from temporal interaction data; applied chi-square feature selection to cut dimensionality by 45%, improving customer targeting precision by 25-35% over the heuristic baseline.
- Validated model robustness with stratified 5-fold cross-validation; presented data-driven insights to 200+ industry attendees, won Best Poster Award at Tech Star Summit, May 2024.

Neural Machine Translation - Multilingual Corpus Preprocessing Aug - Nov 2024

[Python](#) · [Pandas](#) · [HuggingFace Transformers](#) · [Statistical Analysis](#)

- Preprocessed 50,000+ multilingual parallel translation pairs across 4 language pairs; diagnosed tokenization inefficiency, cutting out-of-vocabulary token rate from 12% to 4%.
- Benchmarked BPE, WordPiece, and SentencePiece strategies; recommended 32K vocabulary configuration that improved Seq2Seq model convergence by ~15%, directly applicable to Salesforce's multilingual Einstein AI layers.

Automated Essay Scoring - Benchmarking & Uncertainty Quantification Feb - Jun 2024

[Python](#) · [Scikit-learn](#) · [Matplotlib](#)

- Benchmarked 4 NLP scoring algorithms on 5,000+ essays using Quadratic Weighted Kappa (QWK); top model achieved QWK 0.76, closing 68% of the gap to human inter-rater agreement (0.82).

AWARDS & LEADERSHIP

- Best Poster Award - Tech Star Summit 2024 · "Customer Response Analytics for Insurance Outreach" · Competitive review, 200+ industry attendees.
- Organized 4 technical workshops on Python and ML for 1000+ undergraduates; mentored 8 students, 3 of whom independently submitted research to university symposiums.
